Professional Summary

Passionate Full-Stack Developer with hands-on experience in building high-performance web applications, databases, and AI-powered dashboards. Skilled in Next.js, React, Angular, NestJS, Prisma, MySQL, Python, C++, and Java. Experienced in secure role-based access systems, real-time updates, and scalable full-stack architectures. Proven track record of delivering production-ready projects and educating over 1 million learners worldwide through online programming tutorials.

Education

Bachelor of Science in Computer Science (BSCS)

National University of Sciences and Technology (NUST), Pakistan

Expected Graduation: 2028

Technical Skills

- **Frontend:** Next.js 16, React.js, Angular, Tailwind CSS, Framer Motion
 - **Backend:** NestJS, FastAPI, Node.js, REST APIs, Middleware integration
 - **Database:** MySQL, TiDB, Prisma, SQL optimization
 - **Authentication & Security:** Clerk Auth, Role-Based Access Control (RBAC), Cookies & Middleware
 - **Programming Languages:** JavaScript, Python, C++, Java
 - **Tools & Platforms:** Git, GitHub, Vercel, Docker
 - **AI & ML:** LLM-powered chat systems, AI-driven dashboards
-

Professional Experience

Full-Stack Developer (Part-Time)

CHI Technologies | Dec 2025 – Present | Islamabad, Pakistan

- Developed production-ready full-stack applications with real-time updates and AI-powered dashboards.
 - Built secure, scalable, and modular web applications including dynamic dashboards, e-commerce platforms, and educational systems.
-

Selected Projects

DSA-Driven Library Management System

- Role-based dashboards for Admins, Librarians, and Members with secure access control.
- Implemented AVL Trees, Hash Tables, and Tries for ultra-fast book search and lookup.
- Tech Stack: Python FastAPI + MySQL, Next.js 16, Tailwind CSS, Clerk Auth.

AI-Powered Intrusion Detection & Prevention System (IDPS)

- Enterprise-grade network security system using XGBoost for real-time attack detection.
- Features included audit logging, role-based access control, and cloud-ready deployment.
- Tech Stack: FastAPI, Next.js, Python ML integration.

Developer Portfolio Website

- Fully dynamic, database-driven portfolio with admin dashboard and CMS.
- Integrated Clerk authentication and MySQL backend with responsive UI.
- Tech Stack: Next.js + React, MySQL, Tailwind CSS, Clerk Auth.

Student Management System (Qalam Clone)

- Replicated university-level student portal functionality for Admin, Teacher, and Student roles.
- Features: attendance tracking, assignment submission, grading system, enrollment codes.
- Tech Stack: Next.js 14, Tailwind CSS, TiDB (MySQL), Vercel deployment.

Nadeem Foods – Full-Stack Food Ordering Platform

- Multi-role system: Customer, Vendor, Admin with real-time order tracking.
 - Implemented normalized SQL schema with ON DELETE CASCADE for data integrity.
 - Tech Stack: Next.js App Router, Tailwind CSS, MySQL (mysql2), RBAC.
-

Achievements

- Built a programming-focused Instagram channel [@code_with_nadeem](#) with 19,000+ followers and reached over 1 million learners worldwide.
 - Delivered production-ready full-stack applications covering frontend, backend, database, and authentication layers.
 - Developed dashboards with real-time updates, secure role-based access, and AI-powered interfaces.
-

Languages

- English – Limited Working Proficiency
 - Urdu – Native/Bilingual
-

Interests

- AI & ML Development, EdTech, Web Development, Open-Source Contributions, Programming Tutorials
